

Role-aligned resume

BRAINTRUST / AI LAB ADVISORY
US LETTER / PAGE 1 OF 2

EXECUTIVE PROFILE

Operator-technologist with 25+ years building quality, decision, and operating systems across high-reliability engineering, scaled operations, robotics, and emerging technology - including 9+ years of AI and automation advisory. Makes ambiguous work measurable by defining outcomes, human authority, evidence standards, failure modes, escalation, and learning loops before scale.

ROLE-ALIGNED CAPABILITIES

AI data strategy

Human evaluation design

Quality rubrics

Ground-truth governance

Coverage and edge cases

Calibration and adjudication

Pilot design

Risk discovery

Executive communication

SELECTED EXPERIENCE

Vape-Jet

2025 - Present

Director of Operations

- Leads AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, Odoo, Jira, HubSpot, Slack, telemetry, and AI-assisted workflows.
- Connects factory, field, customer, and machine-fleet signals into earlier risk detection, cleaner handoffs, dashboards, standard work, training, and accountability.
- Works in a software-enabled robotics and machine-vision environment with approximately 1,000 fielded robots informing support and operating feedback loops.

DudeWorth

2017 - Present

Founder / AI and Automation Advisor

- Develops AI-readiness and opportunity frameworks assessing value, feasibility, data readiness, governance, adoption burden, reuse, and time-to-value.
- Designs agentic workflow patterns using structured context, retrieval, AI agents, human judgment, escalation, decision records, evaluation, and governance rails.
- Advises on AI-enabled operations, logistics technology, automation, network analysis, and workflow design.

CANDIDATE THESIS

Define the judgment before you scale the data.

Translate intent into a coverage map, ground-truth authority, observable rubric, calibration system, and acceptance/stop rules.

PRINCIPAL-LEVEL CONTRIBUTION

- Challenge assumptions early.
- Surface failure modes before execution.
- Make ambiguity governable.
- Equip program managers with decision mechanisms.
- Connect quality to scalable operations.

TECHNICAL TOOLKIT

Agentic AI · LLM workflows · RAG patterns
· Human-in-the-loop design · Python · SQL
· JavaScript · TensorFlow · Tableau · Jira · Confluence · Odoo · HubSpot · Slack

Measurement posture: baseline the actual task, risk, and workflow before setting numeric targets. Track construct validity, coverage, agreement, adjudication burden, rework, cycle time, decision utility, and learning velocity.

Complementary depth

ADDITIONAL EXPERIENCE

Amazon

2014-2018

Operations Management / Site Leader

- Led launch and execution for Amazon Prime Pittsburgh in a 24/7 customer-backward environment supporting approximately five million second-day orders annually.
- Built leadership routines, labor planning, throughput visibility, escalation paths, standard work, and operating mechanisms.
- Applied Lean and Gemba practices across safety, quality, throughput, customer experience, and team engagement.

Compunetics

2000-2013

Director of Operations and Engineering Management

- Progressed through R&D program management, production management, strategic acquisition, operations management, and director-level leadership.
- Led engineering, manufacturing, quality, customer delivery, and complex technical programs in advanced electronics and high-reliability environments.
- Built quality systems, standard work, root-cause practices, performance measures, and process controls.
- Collaborated with high-consequence customers and partners including DoD, CERN, Intel, and AMD; published industry articles, delivered technical talks, and participated in the HyperTransport Consortium.

Cardinal Building Products

2021-2023

Regional Director

- Built the company's first remote regional operation and modernized distributed customer, CRM, commercial, fulfillment, logistics, digital marketing, SEO, and online-buying workflows.
- Advanced AI-enhanced transportation-management and route-planning concepts.

ZeusVu

2018-2022

Chief Pilot, Autonomous Systems and Aerial Data Operations

- Led regulated drone operations across medical, energy, logistics, real-estate, and restricted-airspace contexts with a 100% safety record and no FAA incidents.
- Developed TensorFlow-based concepts for automated aerial inventory and computer-vision-enabled field intelligence.
- Designed medical drone delivery and chain-of-custody concepts connecting technology, risk, stakeholders, and governed execution.

Enviro Social Capital

2014-2017

Chairman of the Board

- Co-founded and led a public-private impact initiative; helped shape and evaluate a \$200 million Social Impact Bond feasibility concept for Pittsburgh green-infrastructure improvement.

IEEE

2012-2016

CMPT and EDS Pittsburgh Chapter Chair

- Led regional technology programming connecting industry, academia, STEM outreach, electronics, manufacturing, and emerging technology.

EDUCATION

University of Pittsburgh
Bachelor of Science
Academic grounding in materials science, physical chemistry, and biology-related studies.

CREDENTIALS

- Google AI Essentials
- IBM Enterprise Design Thinking Practitioner
- Six Sigma Certification
- OSHA 10

EVIDENCE TRANSLATION

AI workflows: evaluation, human review, structured context, retrieval, escalation, governance.

Quality: standards, root cause, process control, acceptance, traceability.

Scale: operating mechanisms, distributed teams, high-throughput execution.

Risk: regulated operations, high-reliability technical work, clear authority.

APPLICATION SET

Candidate vision
